

The Vermont Veterans' Home will be utilizing a new Alert System to notify you only of important information, such as Centers for Disease Control (CDC) and Vermont Department of Health (VDH) required information. This new system will allow us to send a message to all our contacts via text, email and/or voice instead of trying to reach each person individually by phone, thus notifying you quicker. In such an instance, you will also be directed to this website for further information (vvh.vermont.gov).

We are sending the "**Test Message**" in order to verify we have correct contact information. You will be asked to reply "Yes" if you have received the message. In addition, you will be asked if you received the message but prefer a different email address or phone number(s), to click on the link that will bring you directly to this letter and to follow the instructions provided. If you **only** receive a text message, that may be because that is the only contact number we have for you. Our text messages are limited to 120 characters so you will be directed to our web page for more detailed information, which will be in the "Coronavirus Information – [Click here](#)" section, if COVID-19 related.

If you would like to add an email address or different phone number(s), please call the Receptionist (Monday-Friday 8:00 am–4:30 pm) at 802-447-6510 or email the information to: robyn.boland@vermont.gov. Thank you for your time and participation.

The "Test Message" will be sent out on: June 17, 2020.

Test Message Letter 06.17.20b
